Company Information

Google identifies and reports child sexual abuse imagery in accordance with federal statutory definition of child pornography as referenced in 18 USC 2256.

Generally, if a report does not contain an upload IP, it may be because Google does not have the information accessible at the time of the report. To the extent that Google does have a record of the upload IP, it can be disclosed in response to valid legal process.

Account information such as IP addresses and user provided information (such as SMS number or secondary e-mail address or Date of Birth) may change over time and/or reflect user provided data that may be inaccurate. This information should be investigated and confirmed independently.

Any account reported in this Cybertip may or may not be disabled in the course of making the report.

For information on which legal process is required for various types of data associated with Google's products and services, please refer to our Transparency Report available here http://www.google.com/transparencyreport/userdatarequests/legalprocess/.

If you intend to seek additional data from Google, please reference this and any related CyberTip number(s) prominently in your legal process.

With respect to the portion of this CyberTip containing the heading: "Was File Reviewed by Company?", when Google responds "Yes" it means the contents of the file reported were viewed by a person concurrently to or immediately preceding the sending of the CyberTip. When Google responds "No", it means that while the contents of the file were not reviewed concurrently to making the report, historically a person had reviewed a file whose hash (or digital fingerprint) matched the hash of the reported image and determined it contained apparent child pornography.
